PROFILE

Operational delivery professional with a strong track record of managing complex caseloads, improving processes, and achieving measurable results for the people I support. My background spans DWP, NHS Lanarkshire, and university research, giving me a combination of frontline casework experience and data-driven analytical thinking. I currently hold dual roles at DWP as both an Operational Delivery Officer and Welfare Support Officer, and I am an MSc-qualified professional with expanding capability in Power BI, data visualisation, and business intelligence through the Cambridge Spark Data Citizen Apprenticeship.

CORE SKILLS

- Caseload and case management
- Welfare and employment support
- UC compliance and ID verification engagement
- Escalation handling and RAG triage documentation
- Policy development and strategy
- Change management and transformation implementation
- Leadership and team development
- Service design and reform
- Power BI and data dashboards
- Stakeholder and partner
- Audit and compliance
- Risk analysis and management
- Governance design and
- Cross-government engagement
- Process improvement
- Data analysis and reporting
- Evidence-based decision making
- Strategic communication

PROFESSIONAL EXPERIENCE

Welfare Support Officer *Department for Work and Pensions (DWP), UK* Feb 2026 – Present

Glasgow Central District (Drumchapel, Govan, Laurieston, Partick) — part of DWP's partnership with Glasgow City Council to reduce child poverty affecting 1 in 4 children across the city

- Manage an active caseload of 80 plus parents and vulnerable claimants, delivering extended one-to-one appointments with an average case resolution accuracy of 70% on first contact.
- Identify and remove practical barriers to employment including childcare, housing, debt, and financial exclusion, contributing to a 35% improvement in claimant progression rates within the first quarter.
- Build and maintain working relationships across 12 plus partner organisations in the Glasgow Child Poverty Programme and No Wrong Door Network, increasing referral uptake by 40%.
- Deliver targeted outreach sessions in community settings, reaching an additional 25 plus claimants per month who would not typically engage through a job centre.
- Coach claimants on Work Allowances, Better Off Calculations, and childcare cost options, with 60% of coached claimants moving into work or training within 3 months.
- Work with the Employer and Partnerships team to identify flexible, family-friendly employment opportunities, successfully placing 15 plus claimants into employment in the first 6 months.

Operational Delivery Officer *Department for Work and Pensions (DWP), UK* Apr 2025 – Present

- Manage 120 plus Universal Credit cases simultaneously, delivering tailored compliance interventions that reduced non-engagement rates by over 30%.
- Built Power BI dashboards integrated with our CRM system, improving breach visibility for line managers by 38% and enabling earlier intervention on at-risk cases.
- Triaged 200 plus escalations using a RAG priority matrix, cutting the case backlog by 32% by directing urgent cases to immediate action while batch-processing lower-risk items.

- Carried out ID verification, residency checks, and entitlement assessments, reducing overpayment risk and maintaining 98% compliance accuracy across all managed claims.
- Rewrote claimant appointment summaries in plain English, reducing repeat queries by 25% and saving approximately 1.5 hours of rework per week.

Frontline Operational Support Officer *NHS Lanarkshire, UK*

May 2023 – Apr 2025

- Worked with clinical teams to redesign patient observation workflows, reducing documentation errors by 25% and improving recording accuracy across allocated wards.
- Supported improved scheduling coordination that contributed to an 18% reduction in average patient waiting times.
- Introduced a stock rotation and replenishment system that cut urgent supply requests by 40%, freeing up nursing staff for direct patient care.
- Led infection prevention audits across allocated areas, helping achieve a 15% improvement in audit scores fed into CQC-equivalent reporting.
- Created a treatment room preparation checklist that reduced equipment-related delays by 30%, improving both staff efficiency and patient experience.

Research Officer *University of the West of Scotland*

Nov 2022 – May 2023

Funded laboratory research into microalgae cultivation for renewable energy applications

- Ran 24-day cultivation trials comparing blue and red LED light, demonstrating a 17.5% increase in biomass productivity under blue light conditions.
- Identified the optimal lipid extraction solvent through multi-solvent comparison trials, yielding the highest lipid concentration and broadest component range.
- Designed and operated a photobioreactor system achieving a validated maximum specific growth rate of 3.526 per day, with results presented in formal research documentation.

Event Services Supervisor *EUROs and FIFA Competition*

Apr 2021 – Nov 2022

- Led hospitality operations for 5,000 plus guests per match day with zero service disruptions across the full competition period.
- Trained new staff using structured onboarding materials, cutting onboarding time by 40% without any reduction in service quality scores.
- Introduced a rapid order process during half-time peak demand, reducing queue times by up to 30%.
- Maintained 100% compliance with UEFA and FIFA food safety and hospitality standards throughout an internationally broadcast competition.

EDUCATION

MSc Chemical Engineering	University of the West of Scotland	2021 – 2022
B.Tech Chemical Engineering	LAUTECH, Nigeria	2012 – 2018

TECHNICAL TOOLS

Power BI · Advanced Excel · CRM Systems · Microsoft Office Suite · SQL (developing) · Aspen HYSYS · MATLAB

PROFESSIONAL DEVELOPMENT

Data Citizen Apprenticeship	Cambridge Spark in partnership with DWP	2026 – Present
Practical training in data analytics, Power BI, dashboarding, Excel, data storytelling, automation, and business intelligence.		
Safety in the Utility Industry	Coursera	2022
Renewable Energy from Biomass Gasification	NSChE	2022
Diploma in Office Applications and Data Processing		2020
Aspen HYSYS and MATLAB		2019 – 2020
Web Design and Development	Datanet Stracon	2017

PROFESSIONAL MEMBERSHIPS

Graduate Member, Nigerian Society of Chemical Engineers (NSChE)
Graduate Member, Nigerian Society of Engineers (NSE)
Alumni, University of the West of Scotland
